ABOUT ME:

Proficient Angular Developer with over 3 years of experience in designing, developing, and optimizing complex web applications. Adept at creating interactive, high-performance applications using Angular, GSAP, ScrollTrigger, Locomotive.js, and Three.js. Demonstrated expertise in backend problem-solving with JavaScript Recently developed innovative projects like a dynamic lucky draw application and the visually captivating Obys Agency website and, such as the Pig Dice Game, Passionate about leveraging emerging web technologies to build scalable, user-focused solutions.

WHAT I CAN DO:

- Frameworks & Libraries: Angular (12–17), GSAP, ScrollTrigger, Locomotive.js, Three.js, Shery.js

- Programming Languages: JavaScript, TypeScript

- Backend & Algorithms: JavaScript (DSA, search, sorting), RESTful API Integration with RXJS

- Frontend Technologies: HTML, CSS, Bootstrap, PrimeNG, Angular Material

- Optimization & State Management: NgRx, Signals

- Web Performance: Lazy Loading, SSR, Web Security

- Tools & Ongoing Learning: angular in depth

WHERE I WORKED:

**SK Finance Limited, Jaipur-----J*an 2024 - Present*

- Designed and developed dashboards to provide actionable insights for business operations.

- Built and optimized the Yard Insurance Portal, reducing manual efforts and streamlining insurance processes.

- Implemented the Meeting Management System for efficient scheduling and tracking.

- Developed the Lence and Locker applications to minimize paperwork and enhance operational transparency.

Velocis Systems Private Limited ------*July 2023 - December 2023*

- Optimized existing codebases for performance improvements.

- Integrated advanced features to support large-scale financial operations.

- Developed reusable components using Angular and TypeScript to accelerate project delivery.

- Ensured responsive designs by implementing Bootstrap and Angular Material.

SISL Infotech Pvt. Ltd.-----*December 2022 - June 2023*

- Developed modules for efficient financial management and reporting.

- Ensured compliance with security protocols and data integrity standards.

- Integrated real-time data visualization dashboards using D3.js and Angular.

Speed Infinite IT Solution, Jaipur ------*Oct 2019 - Nov 2022*

- Transformed creative concepts into fully functional and visually stunning websites.

- Delivered projects ahead of schedule, exceeding client expectations with attention to detail and technical expertise.

- Designed and developed custom animations using GSAP and Three.js for interactive user interfaces.

SCHOOLING (2013-2016)

- earned his Bachelor of Computer Applications (BCA) from Singhania University. This program equipped him with a strong foundation in computer science, software development, and problem-solving skills, forming the basis for his successful career.

EXTRA SKILLS

This section highlights skills developed for personal growth and continuous learning:

- Three.js: Learned to create 3D animations and interactive graphics for web applications.

- Locomotive.js: Developed smooth scrolling effects for enhancing modern UI designs.

- ScrollTrigger: Integrated advanced scrolling animations to improve interactivity.

- GSAP (GreenSock Animation Platform): Designed high-performance animations for web applications.

- React in depth: Delved deep into React.js to expand front-end development expertise.

- JavaScript in depth for Node.js: Enhanced understanding of JavaScript fundamentals to build robust server-side applications.

FUN PROJECTS

- *Pig Dice Game*: designed and developed an engaging dice game that combines fun gameplay with smooth animations and technical sophistication. The project showcases his expertise in DOM manipulation and creating seamless user experiences. [Dice Game](#)

- *Obys Clone*: created a clone of the Obys Agency website, incorporating advanced animations, responsive design, and intuitive navigation. This project demonstrates his ability to deliver high-quality front-end solutions. [obys-agency](#)

SPECIAL CERTIFICATES

- 🏅 earned a Certificate of Excellence in front-end development. This certification highlights his proficiency in modern web technologies, including React.js, Redux, GSAP, and Locomotive.js, as well as his ability to create responsive and dynamic web interfaces that meet the highest standards**.**

WHAT I LOVES

- 📊 enjoys learning and experimenting with new coding techniques and staying updated with the latest web development trends.enthusiasm for continuous learning helps him stay ahead in his field.

- 🏐 passionate about playing volleyball and cricket. These activities reflect his appreciation for teamwork, strategy, and perseverance, which are also evident in his professional approach.
